

U. S. DEPARTMENT OF AGRICULTURE,

BUREAU OF ENTOMOLOGY—BULLETIN No. 71.

L. O. HOWARD, Entomologist and Chief of Bureau.

THE
PERIODICAL CICADA.

BY

C. L. MARLATT, M. S.,

Entomologist and Acting Chief in Absence of Chief.

ISSUED JULY 18, 1907.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1923

CONTENTS.

	Page.
Summary of the habits and characteristics of the Cicada.....	11
The races, broods, and varieties of the Cicada.....	14
A 17-year race and a 13-year race.....	14
Relation of climate to the races.....	18
The dwarf periodical Cicada.....	20
The broods of the periodical Cicada.....	22
The origin of the broods.....	22
The classification of the broods.....	25
The relationship of the different broods.....	28
The relationship of the 17-year broods.....	29
The relationship of the 13-year broods.....	30
Sources of error in the old records.....	30
Broods of 14, 15, or 16 year periods.....	33
Future appearances.....	34
The distribution of the periodical Cicada.....	34
Sources of information.....	34
The general range of the species and of the two races.....	35
The range of the well-established broods, taken in numerical order.....	38
Broods of the 17-year race.....	38
Brood I— <i>Septendecim</i> —1910.....	38
Brood II— <i>Septendecim</i> —1911.....	39
Brood III— <i>Septendecim</i> —1912.....	41
Brood IV— <i>Septendecim</i> —1913.....	42
Brood V— <i>Septendecim</i> —1914.....	43
Brood VI— <i>Septendecim</i> —1915.....	44
Brood VII— <i>Septendecim</i> —1916.....	46
Brood VIII— <i>Septendecim</i> —1917.....	47
Brood IX— <i>Septendecim</i> —1918.....	49
Brood X— <i>Septendecim</i> —1919.....	50
Brood XI— <i>Septendecim</i> —1920.....	54
Brood XII— <i>Septendecim</i> —1921.....	55
Brood XIII— <i>Septendecim</i> —1922.....	57
Brood XIV— <i>Septendecim</i> —1923.....	58
Brood XV— <i>Septendecim</i> —1907.....	61
Brood XVI— <i>Septendecim</i> —1908.....	62
Brood XVII— <i>Septendecim</i> —1909.....	64
Broods of the 13-year race.....	65
Brood XVIII— <i>Tredecim</i> —1919.....	65
Brood XIX— <i>Tredecim</i> —1907.....	66
Brood XX— <i>Tredecim</i> —1908.....	68
Brood XXI— <i>Tredecim</i> —1909.....	69
Brood XXII— <i>Tredecim</i> —1910.....	69
Brood XXIII— <i>Tredecim</i> —1911.....	71
Brood XXIV— <i>Tredecim</i> —1912.....	73

	Page.
The distribution of the periodical Cicada—Continued.	
The range of the well-established broods, taken in numerical order—Cont'd.	
Broods of the 13-year race—Continued.	
Brood XXV— <i>Tredecim</i> —1913.....	75
Brood XXVI— <i>Tredecim</i> —1914.....	75
Brood XXVII— <i>Tredecim</i> —1915.....	76
Brood XXVIII— <i>Tredecim</i> —1916.....	76
Brood XXIX— <i>Tredecim</i> —1917.....	76
Brood XXX— <i>Tredecim</i> —1918.....	77
Systematic position and structural details.....	78
The mouth parts, or beak.....	80
The ovipositor.....	82
The musical apparatus.....	83
The song notes of the periodical Cicada.....	85
The so-called sting of the Cicada.....	87
Transformation to the adult stage.....	89
Period of emergence.....	89
Duration of the adult stage.....	91
Method of emergence.....	91
Cicada huts, or cones.....	92
The act of transformation.....	99
The adult insect and its habits.....	100
Numbers and local distribution.....	100
The food habits of the adult insect.....	102
The Cicada as an article of food.....	104
Oviposition and its effect on the plant.....	106
Plants selected.....	106
Result to the plant of oviposition.....	107
Method of inserting the eggs.....	110
The growth and hatching of the eggs.....	112
The underground life of the Cicada.....	113
Experimental proofs of the long underground life.....	113
A successful 17-year breeding record.....	115
History of the larval and pupal stages.....	117
Technical description of the different stages.....	119
First larval stage.....	119
Second larval stage.....	120
Third larval stage.....	121
Fourth larval stage.....	121
First pupal stage.....	122
Second pupal stage.....	122
The habits of the larva and pupa.....	123
The food of the larva and pupa.....	123
The location in the soil.....	125
The method of burrowing.....	127
Damage occasioned by larvæ and pupæ.....	127
The natural enemies of the Cicada.....	128
Insect parasites.....	130
Dipterous enemies.....	130
Hemipterous enemies.....	131
Hymenopterous enemies.....	131
The parasites of the eggs.....	132
The larger digger wasp.....	133

	Page.
The natural enemies of the Cicada—Continued.	
Insect parasites—Continued.	
Mite parasites of the eggs.....	136
The oribatid mites.....	137
Miscellaneous predaceous mites.....	138
The vertebrate enemies.....	139
The fungous disease of the adults.....	141
Remedies and preventives.....	142
The general character of the problem.....	142
Means of destroying the emerged pupæ and adults.....	143
Collection of adults.....	143
Destruction with insecticides.....	144
Applications to prevent oviposition.....	145
Precautionary measures.....	146
Means against the Cicada in its underground life.....	147
The periodical Cicada in literature.....	148
Bibliography of the periodical Cicada.....	156
Appendix. Dr. Gideon B. Smith's chronology of the periodical Cicada.....	174
Index.....	177
